To: Prospective Project Companies (PPCs)

Subject: Question and Answer Letter No. 2  
Request for Qualifications (RFQ) No. 6M8003  
Design-Build Finance Operate (DBFO)  
Oakland International Airport Connector Project

The following is a response to written questions received from PPCs on the subject RFQ. The response set forth below is for information only and does not constitute a change or modification to the existing proposal documents. Any change to proposal documents will be accomplished by a written Addendum.

**Question 27:**

"The District's Question and Answer Letter issued on April 12, 2006 includes a response to Question 10 that is somewhat confusing. Please clarify whether, if an AGT Supplier is named, only a single technology may be proposed."

**Answer 27:**

Delete the first paragraph of the District's Answer 10 and substitute with the following:

The RFQ defines AGT Supplier as follows: "The AGT Supplier provides the aggregate design, manufacturing, delivery, installation, test, acceptance, safety certification, and support or actual performance of O&M of the AGT Operating System Technology." (See RFQ Sections 9.3.3 and 10.1.5)

The District's intent is that the AGT Supplier need not be a manufacturer itself, but must be responsible for and integrate all the various elements that make up the AGT Operating System Technology. The AGT OST, by definition, includes the Major Subsystems: station elevators and escalators; station equipment; and maintenance equipment and special fixtures. It is not the District's intent, and there is no requirement that, the various elements of the Major Subsystems, or the station elevators and

**escalators, station equipment, and maintenance equipment and special fixtures be provided by the same supplier.**

Addendum No. 4 will be issued shortly providing changes to the RFQ which are consistent with this letter.

If there are any questions regarding the above, please contact the undersigned at telephone number (510) 874-7435 or fax number (510) 287-4810.

Sincerely,
